

BOREOPTIX

Well Inspection Data Collection Software

See what you're missing.

The industry's first software application standardizes the recording and reporting functions of well inspection.

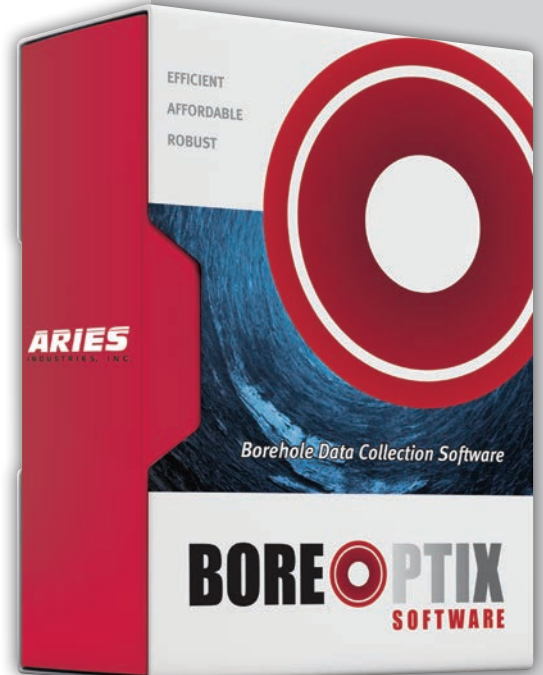

Aries BoreOptix saves time and creates more professional, standardized reports. The program provides robust tools to consistently collect and manage in-the-field inspection video and data.

This affordable software is easy to learn, set-up and use. The simple application provides robust operation with the essential tools to standardize inspection. It is ready to use with little customization required.

BoreOptix integrates seamlessly with Aries systems. It includes one-year free technical support.

BoreOptix works with Aries' mobile and vehicle-mounted inspection systems.

SIMPLE, ROBUST SOFTWARE OPERATION

- » Essential tools for in-the-field well inspection
- » Affordable acquisition and management of video and data
- » Flexible observation codes
- » Uses Aries' field-proven VL5000 Computer Controlled Overlay
- » Report generation includes Top View, Detailed Observation List and Defect Snapshots
- » For use on laptop or PC with support for Windows 7/8/10
- » One-year technical support includes software patches and upgrades
